The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings filed on 12/03/03 are objected to, because the element numbers and the figure labels should be thicker and clearer.

Any corrected drawing sheets must be in compliance with 37 CFR 1.121(d). Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 3, 4, 6, 7, 9, 10, 13, 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Neuwirth ('457).

Regarding claims 10, 13, 18-19, Neuwirth discloses an implant for changing the gynecological state of a female (Figs.1-8), comprising a presterilized substance (see "sterilized" in line 30 of col.10, also see "sterile" in line 57 of col.11), the substance configured for causing a tissue response in uterine tissue (see "applied to the tissue to be treated" in line 67 of col.6 and in line 1 of col.7, also see "react with the target tissue" in lines 52-53 of col.8, also see "tissues contacted...showed reaction" in lines 8-9 of col.11), the substance sized and shaped for sufficiently contacting uterine tissue (see "applied to the tissue to be treated" in line 67 of col.6 and in line 1 of col.7, also see Fig. 1) such that the tissue response (see "react with the target tissue" in lines 52-53 of col.8, also see "tissues contacted...showed reaction" in lines 8-9 of col.11) causes gynecological change in the female (see "so as to treat menorrhagia...heavy menstrual bleeding" in lines 13-14 & 37 of col.1), wherein the presterilized substance is coated with an adhesion inducing substance (see "paste to remain in contact with the target tissue" in lines 5-6 of abstract), wherein the substance is sized and shaped so as to eliminate menorragia (see "so as to treat menorrhagia...heavy menstrual bleeding" in lines 13-14 & 37 of col.1), wherein the substance is sized and shaped so as to cause contraception in the uterus (see "sterilization" in line 40 of col.1).

Regarding claims 1, 3, 4, 6, 7, 9, Neuwirth discloses a method of changing a gynecological state of a female (Figs.1-8), comprising evaluating the condition of a uterus of the female (14 of Fig.1), introducing a presterilized implant into the uterus (see "sterilized" in line 30 of col.10, also see "sterile" in line 57 of col.11, also see Fig.1), contacting the implant with uterine tissue (see "applied to the tissue to be treated" in line

Application/Control Number: 10/726,433 Page 4

Art Unit: 3743

67 of col.6 and in line 1 of col.7) so as to induce a tissue response in the uterus (see "react with the target tissue" in lines 52-53 of col.8, also see "tissues contacted...showed reaction" in lines 8-9 of col.11), maintaining contact between the implant and the uterine tissue (see "to remain in contact with the target tissue" in lines 5-6 of abstract) for at least so long that the tissue response causes a changed gynecological condition in the female (see "so as to treat menorrhagia ... heavy menstrual bleeding" in lines 13-14 & 37 of col.1), wherein the contact between the implant and the uterine tissue is maintained (see "to remain in contact with the target tissue" in lines 5-6 of abstract) at least until contraception in the uterus is achieved (see "sterilization" in line 40 of col.1), wherein the contact between the implant and the uterine tissue is maintained (see "to remain in contact with the target tissue" in lines 5-6 of abstract) at least until menorragia has been substantially eliminated in the female (see "so as to treat menorrhagia...heavy menstrual bleeding" in lines 13-14 & 37 of col.1), wherein the presterilized implant is coated with an adhesion inducing substance (see "paste to remain in contact with the target tissue" in lines 5-6 of abstract), wherein the presterilized implant is coated with a biologic coating prior to introducing the implant into the uterus (see "non-toxic" in line 64 of col.3), wherein the presterilized implant is introduced through a catheter (see "catheter" in lines 31 & 32 of col.4).

Allowable Subject Matter

4. Claims 2, 5, 8, 11-12, 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/726,433 Page 5

Art Unit: 3743

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Neuwirth ('492) is cited to show an intrauterine procedure.

Spinale et al, Cohn et al and Goldberg et al are cited to show adhesions.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fadi H. Dahbour whose telephone number is 571-272-4792. The examiner can normally be reached on M-F, 9am-5:30pm est.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry A. Bennett, can be reached on (571) 272-4791.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
